

OKS 3750 - Product Information

Fields of Application:

Lubrication of chains, joints, guides, plain and roller bearings, toothed gears, fittings, hinges, locks and other mechanics especially with high loads and with water influence. Use in precision mechanics, for office technology and in all areas of the food, beverage and pharmaceutical industry where hygienically harmless lubricants with good adhesion are necessary.

OKS 3750 Adhesive Lubricant with PTFE

Advantages and Benefits:

Extended operating time, caused by optimal additivation for good oxidation and aging stability. Resistant against cold and hot water, moisture, alkaline and acidic disinfectants and detergents used in the food industry. Universally applicable due to its long-term lubrication and high adhesive power. Registered by the NSF in the category H1 with the registration number 124383.

Application:

For best results, first clean mechanically, then with an universal cleaner like OKS 2610/OKS 2611. Lubrication in a sufficient amount with brush, dip oiler, dipping or suitable automatic lubrication systems. Instructions of the machine manufacturer have to be observed. Relubrication periods should be defined according to the operation conditions. Mix with suitable lubricants only. For additional questions, please contact our Technical Department.

Additional Information:

Packaging (article number):

- 5 l Canister (03750050)
- 25 l Canister (03750062)
- 200 l Drum (03750072)
